

Beth Israel

Do you suffer from **BACK PAIN?**

Have you suffered for at least three months with this pain? Have you ever been diagnosed with a back condition like spondylosis?

Dr. Marco Pappagallo of Beth Israel Medical Center (16th Street and First Avenue, Manhattan), and his study team are currently investigating a new treatment for back pain. Preliminary findings suggest that this treatment may be helpful!

If you are 21 years of age or older, have never had back surgery, and you are neither pregnant nor a nursing mother, you may be eligible to participate in the trial of Pamidronate for back pain, sponsored by the National Institutes of Health.

If you would like to participate or need more information, call Ms. Janet Auger at Beth Israel's Department of Pain and Palliative Care at:

212-844-1501
